EDUCATION

University of Guelph

Bachelor (Hons.) of Software Engineering (Co-op), Economics Minor

- Deans Honors List
- Water-polo Club

Sep. 2021 – Apr. 2025
Guelph, ON

SKILLS & INTERESTS

- Languages: Python, Pandas, R, MySQL, C, C#(.NET), Java, HTML, CSS, TypeScript, JavaScript (React), GoLang
- Soft Skills: Problem-solving, Analytical Thinking, Attention to Detail, Agile Development, Collaboration, Technical Communication
- Interests: Motorcycles, Music Production, Triathlons, Card Games, Hiking & Camping, Pickleball enthusiast

WORK EXPERIENCE

Purolator Digital Lab

Software Engineering Co-op

Jan. 2024 – Aug. 2024
Kitchener, ON

- Designed and implemented HTTP triggers with **C#** in a **.NET**-based mapping system to consolidate and process address data from multiple sources, enabling more efficient route optimization and improving data consistency across applications.
- Took on DevOps tasks to set up new project infrastructure using **Azure** DevOps, including **CI/CD** pipelines and **Terraform**, leading to faster deployment cycles and improved system reliability.
- Optimized application search capabilities by 10x using **ElasticSearch** in **Python**, refining query indexing and data structuring, allowing the system to process and consolidate millions of data records with significantly improved retrieval speeds.
- Developed a **predictive maintenance AI model** using **Random Forest** and **Python**, analyzing historical failure data to predict equipment failures with 92% accuracy, reducing downtime and optimizing maintenance schedules.

System1

Software Engineering Co-op

May 2023 – Aug. 2023
Guelph, ON

- Developed **API** & E2E testing frameworks in **Python** and CI/CD pipelines using **Jenkins** to improve software deployment and testing processes, leading to more efficient, reliable code delivery and an 80% reduction in manual testing efforts.
- Implemented automated testing frameworks for a search engine using MS **Playwright** in **TypeScript**, improving test coverage and reducing human error.
- Set up automated linting and formatting for team-owned repositories, ensuring consistent code quality.

Sun Life Financial

Cloud Solutions Analyst

Sept 2022 – Dec. 2022
Toronto, ON

- Optimized the performance of **AWS EC2** instances, **S3** storage, and **Lambda** functions by using **Java** scripts for automating and monitoring configurations, increasing responsiveness and cost-effectiveness by 20%.
- Assisted in the **migration** of legacy code to cloud infrastructure, reducing operational downtime by 30%.
- Collaborated closely with developers and teams to troubleshoot and resolve AWS service-related issues, enhancing my ability to work with **diverse** teams.

Dev Ops Automation Engineer

May 2022 – Aug 2022

- Played a key role in the organization's recent DevOps transformation at Sun Life, where DevOps practices were newly introduced and implemented across all processes. Utilized **Jenkins** for CI/CD pipelines, **Docker** for containerization, and **Terraform** for Infrastructure as Code (**IaC**).
- **Developed** monitoring dashboards using **Grafana**, integrating real-time **system metrics** to provide actionable insights into resource consumption and performance

University of Guelph

Teachers' assistant

Fall 2023 & Fall 2024
Guelph, ON

- Taught the core fundamentals of **Object-Oriented Programming** through interactive discussions and practical labs, fostering a deeper understanding of programming concepts among students.

PASSION PROJECTS

DressToImpress.ai

January 2025

- Engineered a real-time AI-powered style recommendation system in **Python**, analyzing image-based facial features, body measurements, and personal style preferences.
- Processed and categorized vast datasets from Pinterest **APIs**, generating customized fashion suggestions based on user inputs.
- Built an interactive Streamlit application, handling large image datasets while ensuring fast processing and real-time responses.
