WORK EXPERIENCE

Purolator Digital Lab

Jan. 2024 – Aug. 2024

Software Engineering Co-op

Kitchener, ON

- Designed and implemented HTTP triggers with **C#** in a **.NET**-based mapping system to consolidate and process address data from multiple sources, enabling more efficient route optimization and improving data consistency across the application.
- Took on DevOps tasks to set up new project infrastructure using **Azure** DevOps, including **CI/CD** pipelines and **Terraform**, leading to faster deployment cycles and improved system reliability.
- Enhanced application search capabilities by 10x using **ElasticSearch** and ES queries with **python**, enabling the application to process and consolidate 10 times more data, improving search speed and accuracy.
- Developed a predictive maintenance application using a **Random Forest AI** model, analyzing historical maintenance data to predict failures with **92% accuracy**, reducing downtime and optimizing maintenance schedules for improved operational efficiency.

System1

May 2023 – Aug. 2023

Software Engineering Co-op

Guelph, ON

- Developed **API** & E2E testing frameworks in **Python** and CI/CD pipelines using **Jenkins** to improve software deployment and testing processes, leading to more efficient, reliable code delivery and an 80% reduction in manual testing efforts.
- Implemented automated testing frameworks for a search engine using MS **Playwright** in **TypeScript**, improving test coverage and reducing human error.
- Set up automated linting and formatting for team-owned repositories, ensuring consistent code quality.

Sun Life Financial

May 2022 – Dec. 2022

Cloud Solutions Analyst

Toronto, ON

- Optimized the performance of **AWS EC2** instances, **S3** storage, and **Lambda** functions by using **Java** scripts for automating and monitoring configurations, increasing responsiveness and cost-effectiveness (by 20%).
- Assisted in the migration of legacy code to cloud infrastructure, reducing operational downtime by 30%.
- Presented the cost and time efficiencies achieved by the team's initiatives through **Grafana**.
- Collaborated closely with developers and teams to troubleshoot and resolve AWS service-related issues, enhancing my ability to work with diverse teams.

Dev Ops Automation Engineer

- Played a key role in the organization's recent DevOps transformation at Sun Life, where DevOps practices were newly introduced and implemented across all processes. Utilized **Jenkins** for CI/CD pipelines, **Docker** for containerization, and **Terraform** for Infrastructure as Code (**IaC**).

The University of Guelph

Fall 2023 & Fall 2024

Teachers' assistant

Guelph, ON

- Taught the core fundamentals of **Object-Oriented Programming** through interactive discussions and practical labs, fostering a deeper understanding of programming concepts among students.

SIDE PROJECTS

DressToImpress.ai

January 2025

- Developed an AI-driven fashion recommendation system using **OpenAI's GPT-4** to analyze hair & facial features, body measurements, and personal style.
- Integrated Unsplash & Pinterest **API** to retrieve personalized outfit and hairstyle inspiration based on AI-generated fashion keywords.
- Built an interactive **Streamlit** application for real-time image analysis, styling suggestions, and seamless user experience.

EDUCATION

University of Guelph

Sep. 2021 – May 2025

Bachelor (Hons.) of Software Engineering (Co-op), Economics Minor

Guelph, ON

- Deans Honors List
- Water-polo Club

SKILLS & INTERESTS

- Languages: Python, C, C#, Java, HTML, CSS, TypeScript, JavaScript (NodeJS, React Native), MySQL, R, GoLang
- Skills: Jenkins, ElasticSearch, Docker, Kubernetes, Packer, Terraform, Grafana, Azure, REST APIs, GitHub Actions, OOP
- Interests: Motorcycles, Music Production, Triathlons, Card Games, Pickleball enthusiast
